## **DETAILED ACTION**

### ***Response to Amendment***

The declaration filed on 1/27/06 under 37 CFR 1.131 is sufficient to overcome the Lobb et al and Pompei references.

### ***Response to Arguments***

Applicant's arguments, see the declaration, filed on 1/27/06, with respect to the rejection(s) of claim(s) 1-23 under 35 U.S.C. 102 and 103 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Weinreich, US Patent 6,263,083.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Weinreich. Weinreich discloses a directional loudspeaker system 30 comprising a plurality of speakers 42, 44, 46, 48, a defined sound target (see figure 2), and delay means 66, 68, 70, 72 for creating a sound pattern which has constructively interference at a target area. Claims 1 and 2 are met.

### ***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Art Unit: 2615

Claims 3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Weinreich. Weinreich does not disclose that the speakers are mounted to a ceiling or indicia positioned within the room providing information for gaining access to the sound target. Examiner takes Official Notice that it was well known at the time of invention to supply loudspeakers in ceilings for the purpose of providing sound while maximizing living space in a room, a beneficial feature. In addition, it was obvious at the time of invention to mark a location where sound is heard, for the purpose of eliminating confusion of the listener.

***Allowable Subject Matter***

Claims 4, 6, and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 8-23 are allowed.
